Frozen D predicts finite-time purity loss
Mean purity loss
Evolution time T
$\gamma = 0.15$: exact channel
$\gamma = 0.5$: exact channel
$\gamma = 1.25$: exact channel
Frozen D predictor + known decay law
Prediction error after analytic transfer
1e−6
RMSE of transferred purity loss
Evolution time T
$\gamma = 0.15$
$\gamma = 0.5$
$\gamma = 1.25$
